**Pain can be a challenge to treat
.....until now!**

What is EPAT?

- EPAT therapy is a treatment method for pain whereby high-energy sound waves are introduced into the painful areas of the body.
- EPAT is one of the most advanced and highly effective non-invasive treatment methods cleared by the FDA for pain.
- EPAT eliminates pain and restores mobility quickly improving patient's quality of life.

BENEFITS OF EPAT THERAPY

91% Success Rate! (As per clinical studies)

- Accelerated Healing
- Non-Invasive
- No Anesthesia Required
- No Side Effects
- No Risk of Infection
- No Scarring
- Highly Effective

How EPAT Works

- Accelerates healing by stimulating the metabolism and enhancing blood circulation to regenerate damaged tissue.
- High energy acoustic sound waves are introduced into the body by penetrating tissue, and stimulating cells responsible for bone and connective tissue healing.
- Uses your body's existing and natural healing agents such as red blood cells, growth factors and mobilizes stem cells.
